

DETAILED REPORT

1. OBJECTIVES:

A. Goals :

The main aim of the project is Performance Assessment of Moodle and creates a baseline for the same. In this, we are finding performance issue and ways to fix them.

Moodle stands for acronym for modular object-oriented dynamic learning environment . Moodle is a LMS ie a Learning Management System. Moodle is used for blended learning, distance education, flipped classroom and other e-learning projects in schools, universities, workplaces and other sectors.

In this part of the test we are interested in finding the bugs and ways to fix them.

B. Deployment Infrastructure :

1] Target Infrastructure:

i. Hardware Configurations :

16Gb RAM

Processor : Octa Core

ii. Software Configurations :

OS : Ubuntu 14.04

Database : MySQL

Language : PHP

2] Test Infrastructure :

i. Load Generator:

8Gb RAM

Processor: Quad Core

ii. Tools :

Jmeter 3,Gatling 2.2.2, SAR

The instance of moodle used for this test was deployed on 172.22.22.11.

C. Bugs Detected

- High response time for Homepage, Login and Logout

D. Fixations:

- Disable the debugging option.
- The list of courses Visible on homepage to be reduced.
- Increase cache size, enable query cache type in Mysql database
- Increase cache size of opcache of moodle

2. MOODLE METRICS

The metrics that we would be interested wrt Moodle are :

- Number of courses offered
- Number of users
- Types of courses
- Types of users

The values for the above metrics are:

Total Number of courses :250

Types of courses:

1. Large courses:25
2. Medium courses:130
3. Small courses:65
4. Extra small courses :30
5. Number of users:100,000

3. SCENARIO DESCRIPTION

A] Reading Contents from Multiple Courses :

1. Login as student
2. Go to courses
3. Go to topic and select
4. Read contents
5. Logout

B] Commenting on Forum :

1. Login as student
2. Go to courses
3. Select forum
5. Read contents or comment on post
6. Logout

C] Taking Quiz :

1. Login as student
2. Go to courses
3. Select quiz
5. Attempt quiz
6. Logout

4. TEST LOAD

NO.	TEST	Number of users	Ramp up(seconds)	Duration (min)	Loop
1.	READ CONTENT	50	50	15	10
		100	100	15	10
2.	POST ON FORUM	50	50	15	10
		100	100	15	10

3.	QUIZ	50	50	15	10
		100	100	15	10
4.	MIXED SCENARIO TEST	50	50	15	20
		100	100	15	20

5. RESULTS
